AIR CARE HACKATHON for Breathe.mk

Contributed to a multi-disciplinary team developing an app for identifying air pollution hotspots, aimed at promoting environmental consciousness. My role focused on designing responsive user interfaces with Next.js, ensuring seamless integration with back-end systems. The app successfully heightened public awareness about air pollution.

Tech stack

Next.js, Typescript, Bootstrap, Formik, Leaflet, YUP

[View Code](#)

Igralishte.sk

Created an online platform for a vintage women's clothing store using NextJS and json-server, incorporating e-commerce features and a mock REST API. This project, part of my academic work, combined aesthetic design with functional back-end structures using NodeJS and related packages.

NEXT.JS, Node.js, Nodemon, Typescript, Bootstrap, Formik, Leaflet, React-webcam, UUID, YUP

E-commerce platform

Developed a fashion-focused e-commerce app using React.js, featuring an intuitive interface with Firebase backend for secure transactions. Enhanced with SASS, styled components, and Redux for visual appeal and performance, it merges fashion with advanced web technology.

React.js, Firebase, Styled-components, SASS and Redux

Marinov Design

Marinov Design is a bespoke e-commerce platform I developed, showcasing unique handcrafted jewelry and home decor. This project was an exciting opportunity to blend artistic content with cutting-edge web technologies, creating a unique online shopping experience that emphasizes craftsmanship and uniqueness
